

Electrician

Responsibilities:

Installs, services, and repairs wiring, conduits, fixtures and other electrical devices and systems in an industrial or commercial setting. Our Electricians are responsible for working with a tight-knit team to maintain line integrity, safety, production and quality standards. You will also be creating solutions both proactively and reactively in a fast-paced environment to maintain and improve line efficiency. We are taking applicants with or without a license.

Qualifications:

- Experience working in a fast-paced manufacturing facility trouble-shooting industrial electrical and electronic systems.
- Ability to interpret blueprints, schematics and wiring diagrams
- Ability to utilize Microsoft Office and experience with CMMS
- An Associate degree in Industrial Electricity/Automation related field or a minimum of 3 experience as an Industrial Electrician
- Wiring 3 phase motors, starters, and overloads
- Must be able to program VFD's
- Knowledge of pressure sensors, flow meters, temperature sensors, and reading and assimilating any technical documentation to assist in the use or repair of any control device
- must be able to pass a drug and background screening

Competencies

- Ability to read and interpret documents such as safety rules, operating and maintenance instructions, and procedure manuals.
- Ability to write routine reports and correspondence and speak effectively.
- Ability to calculate figures and amounts such as proportions, percentages, area, circumference, and volume.
- Ability to apply concepts of basic algebra and geometry. Ability to solve practical problems and deal with a variety of variables in situations where only limited standardization exists.
- Ability to interpret a variety of instructions furnished in written, oral, diagram, or schedule form

Benefits

- Competitive wages
- Benefits after 90 days (health, dental, vision, etc.).
- Ongoing training and education

Job Type: Full-time
